# Glossop Health Team - Cervical Screening

## Don't ignore your cervical screening invite

Two women die every day from cervical cancer, but getting your screening can help stop it before it starts.

So remember, if you missed your last one, book an appointment with your GP practice now.

To find out more visit [nhs.uk/cervicalscreening](https://nhs.uk/cervicalscreening)

**Help Us Help You – Screening saves lives**

Information from the NHS.

Help us help you

Cervical screening checks the health of your cervix. It is not a test for cancer, it is a test to help prevent cancer.

All people with a cervix aged 25 to 64 should be invited by letter. During the appointment, a small sample of cells is taken from your cervix and the sample is then checked for HPV that can cause changes to the cells of your cervix.

If HPV is not found, there will be no further tests needed!

Get in touch with your GP if you think you are due to have cervical screening but have not had an invitation.
